USSN 10/773,176 Art unit 1712 Examiner Metzmaier

## Amendments to the specification:

Please replace the title with the following amended title:

Mutual Solvent System and Method for Improved Oil and Gas Permeability

Please replace paragraph 02 with the following amended paragraph:

There is therefore provided a <u>solvent system and method of using a</u> solvent system for use in acidizing and cleanup in oil wells and gas wells. The solvent system comprises a combination <u>of thereof</u>, a substantially water-soluble alcohol, such as methanol, or ethanol or any mixture thereof, a substantially water / oil-soluble ester, such as one or more C<sub>2</sub> - C<sub>10</sub> esters and a substantially water / oil-soluble ketone, such as one or more C<sub>2</sub> - C<sub>10</sub> ketones. A preferred ketone solvent is methyl ethyl ketone. A preferred substantially water-soluble alcohol is methanol. A preferred substantially water / oil-soluble ester is methyl acetate.
